

# Pine Outdoor Furniture

This furniture is made entirely of number one grade pressure-treated yellow pine, which is kiln-dried before and after the treatment process. The result is beautiful lumber that is free from the high moisture content of normal treated wood. This helps to prevent the wood from the cracking or warping that occurs with lower grade lumber. Our lumber is then milled to a smooth surface and the edges are rounded before being carefully sorted to nearly eliminate unsightly knots and irregular wood grain. Our furniture comes fully assembled and we use only the best hardware to prevent rust. Most of our furniture hardware is stainless steel.
