

Lighthouses

Lighthouses are all made to withstand the elements. All have lights in them. A solar light is available for the pine and cypress lighthouses. Many of the lighthouses can be equipped with a rotating beacon. Painted patterns include: Cape Henry, Cape Hatteras, Vermilion, Marblehead, Barnegat, Enhanced Barnegat and striped (standard). CWF (clear wood finish) is also available, if you do not like paint. Colors are only limited by your imagination. The **painted** lighthouses are hexagonal. The treated lighthouses are made of pressure-treated plywood and have a cedar roof.

Pine lighthouses are octagonal and have a cedar roof. These are made from pressure-treated solid lumber (not plywood).

Cypress lighthouses are round with an octagonal base. These are available either plain or painted.

Vermilion

Cape Henry

Standard Painted Lighthouses
