Rustic Real Log Cabins

Hillside Hideaway now offers real log cabins. These are made of solid logs with chinking to insulate between them. They have 6.5' sidewalls to make them easier to transport fully assembled. We can also build them on site for an extra charge or you can assemble them yourself. These cabins can be insulated. We use 1/2" fiber-board floor insulation, gable insulation, and 3/4" foil board roof insulation.

Base cabin standard features:

- 4x4" treated skids
- 2x4" treated floor joists on 16" centers
- 3/4" treated plywood floor
- Sidewall height: 6.5'.
- 2x4" rafters on 24" centers
- 4x6" logs
- Stained to your color choice
- One 30" wood door
- No windows
- No loft
- 5/8" plywood sheathing
- Roof pitch: 5/12 to 6.5/12 depending on width of cabin
- 6" roof overhang
- Architectural 30 year asphalt shingle or metal roof (your color choice)
- Felt paper & aluminum drip edge when using asphalt shingles
- Unfinished interior
- You have a choice of two basic styles: door on the side or a door on the end. (You can opt to have a porch over the door as shown. You can also have a loft over the porch on this style.)

Rustic Real Log Cabin with porch on side.

Rustic Real Log Cabin with porch on end.

Inside of front door.

Interior with loft and ladder.
