Composting Toilets

Sun-Mar is the world leader in composting toilets, and dominates the North American market with its unparalleled range of 19 models from 5 different product families. Each model is distinguished by innovative design, superior technology, and Sun-Mar's legendary quality. Each carries an amazing 25 year warranty on the body. These toilets are environmentally-friendly, odorless and require no septic system and no chemicals. Applications include residential, light commercial, cottages, cabins, summer homes, buildings, workshops, boats, and RV's. We also offer quaint outhouses for these toilets.

For more information, we have catalogs and videos from Sun-Mar. You can also visit www.sun-mar.com. If you still have questions, we encourage you to call us and discuss your particular situation. We use a Sun-Mar Excel Electric toilet at our display park.

SUN-MAR's new Garden Composters incorporate our patented, double-drum Autoflow design. With Autoflow, material goes in the top and compost exits out the end as the drum rotates. As the drum rotates, compost moves along the outer drum and then back through the inner drum before dropping from the output port.

The Unique Features of SUN-MAR's Autoflow technology include::

- compost discharges automatically
- no waiting for compost batches to finish
- pest resistant
- easy loading and turning of the composter

Sun-Mar 200 Garden Composter
